

Orchestrating
lower management costs
at every level

Because time is of the essence...

With the **Insurer Self-Administration** module, ALLEGROUPE offers the insurer a multiple Enterprise Self-Administration module that can:

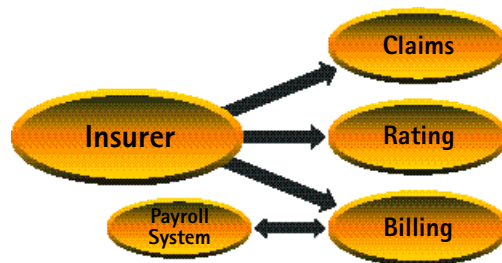

- use ALLEGROUPE's cutting edge functionalities to manage individual companies;
- offer secure electronic access to a group of companies that prefer remote self-administration.

With the **Insurer Sales Sector** module, ALLEGROUPE offers the insurer a management tool that can:

- help sales sector managers with their assigned portfolios by providing a comprehensive management tool for sales and service representatives;
- allow manual input or electronic transfer of data for requests for proposals;
- input confirmed sales;
- generate reports on sales;
- interface with the insurer's internal systems (administration, benefits, rating);
- interface with the **Insurer Billing** module;
- interface with external systems developed by MDI for businesses and group benefits advisors.

Data sharing between the insurer's operating sectors creates higher productivity and efficiency.

Comprehensive software...
Because time
is of the essence

ALLEGROUPE has been meeting specific needs of insurers since early 1999. And MDI will continue to expand the current family of products.

With the **Insurer Billing** module, ALLEGROUPE offers insurers a comprehensive management tool that can:

- prepare and download Stand-alone Self-Administration, Linked Self-Administration and Staff Movements modules for the use of clients (enterprises);
- deploy upgrades from MDI or update data (rates, coverage, etc.) within the Enterprise modules in use;
- retrieve employee information from a text file configured to MDI standards when developing Enterprise modules;
- import staff movement information from Enterprise modules in use;
- transfer data (text files) configured to the insurer's standards from Enterprise modules to the insurer's central system;
- transfer data from Staff Movements modules to the central administration system;
- transfer data from Linked Self-Administration and Staff Movements modules to the central benefits system;
- export through the Insurer data to prescription drug or dental card suppliers in cases where the client has selected a payment card;
- post data processed by the program, either for one group or for all groups;
- manage taxes and optimize income tax allocation;
- manage flexible, modular or division/class plans.

is a finely tuned electronic tool that allows enterprises and advisors to share data, eliminating unnecessary duplication.

reduces management costs and increases data control at every level of data administration.

grows business by adding value that promotes business relations with enterprises and advisors.

offers fast activation and deactivation to improve regulatory control, reduce administration costs and provide members with instant responses.

is a highly developed productivity tool supported by a top-notch team.

Because time is of the essence...
